Maxi-Tip Scrapers and Blade Holder

MAXI-TIP is manufactured from abrasion resistant TPU resins for stability and toughness. Life spans of 4-6 times that of similar scrapers have been reported. Moderate flexibility also allows easy assembly on trough angles, V-plows and "arc" mounts.

MAXI-TIP II scraper is used when applications require greater rigidity and stiffness. This scraper is excellent for pulley cleaning, heavy product plowing and general applications.

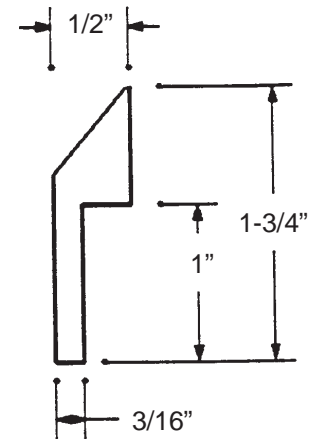

MT DUAL DUROMETER scraper is a co-extrusion with a rigid base for mounting and a soft, flexible tip all in one piece. The larger base allows for direct mounting to cross supports and frames, where a Blade Holder cannot be installed. This scraper cannot be used in a blade holder.

BLADE HOLDER is a 6005-T6 Clear Anodized Aluminum Extrusion which keeps Maxi-Tip and Maxi-Tip II scrapers properly oriented to the work area. It maintains constant, even pressure over the blades entire length. Blade Holder keeps your conveyor clean, neat and sanitary.

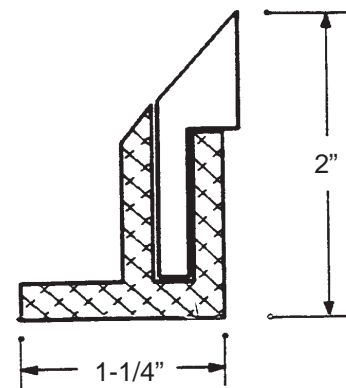

Item No.	Description
57811	MAXI-TIP, 8 ft. length, TPU Scraper
57812	MAXI-TIP, 8 ft. coil, TPU Scraper
57810	MAXI-TIP II, 8 ft. length, PE Scraper
57814	MT Dual Durometer, 8 ft. length
57813	Blade Holder

ALL MAXI-TIP PRODUCTS ARE APPROVED FOR
FDA/USDA/DAIRY APPLICATIONS
