PURE GOLD

Small Diameter/Differential - Model 1250 DFX

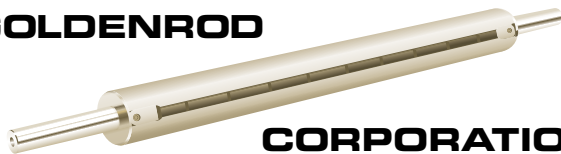

Goldenrod introduced **Small Diameter** differential shafts over ten years ago and offers a proven 1" and up design, perfect for tapes and ribbons. Proprietary tension ledge material is housed in 3 full length milled slots. Continuous and controlled air pressure controls the web tension of the individual slits. The small diameter DFX shaft is turned from one-piece, solid steel which translates into less deflection, higher run speeds with less vibration, and less bending. Available in lengths up to 100" long.

#### Key Features:

- Consistent web tension control . . . 3 ledges at 120 degrees; constant air for smooth/repeatable control
- Shaft automatically adjusts tension for different width cores
- Long life - wear resistant/high temp friction ledges
- Simple set-up includes two core stop rings / use empty cores for spacers
- Custom designed for your machine
