

MODEL DS-50-150

Many high quality steel knife blades with various cutting edge bevels and angles can be employed to maximize knife life and roll edge quality.

The Dienes Group, recognized World Wide as the leader in engineered slitting products, proudly introduces a new shear knife holder that provides the expected Dienes quality with economical pricing. In addition, with a 150 mm (5.8") knife blade, the DS-50-150 can handle most converting application with speeds up to 5,200 mpm. Dienes can also provide technical support to assure a smooth replacement transition with various mounting adapters available. When looking to up grade, consider the Dienes World Wide way.

MODEL DS-50-150
